Subject: RE: LBG Oversight Logistics

Kristen –

LBG oversight will only occur on Wednesday (Feb 27) during the rising hydrograph.

On Wednesday, we are targeting four split samples. We are flexible where the samples are collected; however, if possible, we would like to target NB South (top and bottom) and NB North (top and bottom).

We will be coordinate with Ryan McCarthy on-site for sample collection; however, if you have any field schedule (sampling times) available, please send it along.

Thank you. Do you have locations/depths in mind? We are sampling the first at 0800 wed, then second sample around 0800 thursday. After that, we need to check flows to find peak.

Subject: LBG Oversight Logistics

George and Kristen –

For tomorrow's anticipated high flow event, LBG is planning the following oversight activities:

- Oversight staff: Jordan Goldstein (cell 1-845-238-0221)
- ASI vessel (R/V Delaware) will be mobilizing at Elizabeth Marina. ASI captain is Steve Brodman's cell 908-347-3927.
- We will be targeting four split samples plus QC. Splits will be collected for Group A and B parameters.

We are currently planning on being at Elizabeth Marina by 7 am on Wednesday February 27. We will refine our start time once a field schedule is available.
